

Environmental Policy

GT Emissions Systems Limited based 3 Traynor Way, Peterlee, design and manufacture exhaust gas control valves and other precision machined components in ferrous and non-ferrous materials to customer specifications.

We are committed to protection of the environment through responsible management, compliance with legal requirements, prevention of pollution and continual improvement. We regard high environmental standards as a key element for our continued success. We have implemented an Environmental Management System to comply with ISO 14001:2004 to help achieve our aims.

To achieve our aims we will:

- Use processes, practices, materials or products that prevent, reduce or control pollution where practicable.
- Achieve continual improvement in overall environmental improvement performance through an annual review of objectives and targets identified during the evaluation of environmental aspects and impacts, audits and annual reviews.
- Seek to increase energy efficiency
- Provide our employees with the information, training and responsibility necessary to comply with this policy.
- Respond to relevant communication from external interested parties.
- Review the effectiveness of the policy annually with senior managers under the chairmanship of the Managing Director
- Ensure this policy is available to the public

This policy is approved by the undersigned and is supported by all the levels of management within the organisation. All personnel shall be guided by the contents of the environmental management system and no deviation from the policy and procedures set down shall be permitted.
